DAHTEC SAFETY NETTING (DSN)

The safety net is used to prevent the fall of people and objects or the hit by falling objects, and protects the safety of both aerial operating workers and passers-by, maintaining safe and orderly field construction. We have two types of safety net. Vertical safety net (Light Duty Netting) and Horizontal safety net (Catch Net or Heavy Duty Netting).

It is made of polyethylene, as HDPE, and there is metal eyelets and serging on every edge. The width is 6m, the length is 30m. We can produce as customer's request.

* Special size available upom customer's request
